INDEPENDENT INVENTOR(S)

VERIFIED STATEMENT (DECLARATION) CLAIMING SMALL ENTITY
STATUS (37 CFR 1.9(f) and 1.27(b)) - INDEPENDENT INVENTOR

As a below named inventor, I hereby declare that I qualify as an independent inventor as defined in 37 CFR 1.9(c) for purposes of paying reduced fees under section 41(a) and (b) of Title 35, United States Code, to the Patent and Trademark Office with regard to the invention entitled Skateboard described in

Insert title of

CROSS-REFERENCES TO RELATED APPLICATIONS

Not Applicable.

BACKGROUND OF THE INVENTION

FIELD OF THE INVENTION

The present invention relates to a skateboard.

DESCRIPTION OF THE RELATED ART

A first conventional skateboard in accordance with the prior art shown in Fig. 4 comprises an elongated solid body (40) made of plastic by means of an injection molding process, two support brackets (41) each secured on one of the two end portions of the elongated body (40) and each having two wheels (42) each rotatably mounted on one of the two end portions thereof. However, the solid body (40) is heavy, thereby decreasing its portability and increasing the cost of manufacturing. In addition, the solid body (40) lacks flexibility and elasticity, thereby reducing the manipulation and movement of the skateboard. Moreover, the elongated body (40) made of plastic cannot be reused when it is worn out.

A second conventional skateboard in accordance with the prior art shown in Figs. 5 and 6 comprises an elongated sheet-shaped body (50) made of an alloy, a reinforcing frame (52) secured on the bottom of the body (50), two support brackets (52) each secured to one of the two end portions of the reinforcing frame (51) and each having two wheels (54) each rotatably mounted on one of the two end portions thereof. However, the sheet-shaped body (50) is weak and is easily deformed when hit by foreign objects.

The present invention has arisen to mitigate and/or obviate the disadvantage of the conventional skateboards.

BRIEF SUMMARY OF THE INVENTION

In accordance with one aspect of the present invention, there is provided a skateboard comprising an elongated body including a top plate, a bottom plate and two opposite closed side plates each located between the top plate and the bottom plate, and a plurality of reinforcing ribs each longitudinally arranged in the elongated body and each supported between the top plate and the bottom plate.

1 The elongated body includes a support base formed on the mediate portion of the
2 top plate thereof, and the skateboard comprises two strengthened frames each longitudinally
3 arranged in the elongated body located adjacent to the support base, and each supported
4 between the top plate and the bottom plate. Preferably, the elongated body, the reinforcing
5 ribs and the strengthened frames are integrally made of an aluminum alloy.

6 The skateboard further comprises a foam core material inside the elongated body
7 located between each of the strengthened frames and reinforcing ribs. The skateboard further
8 comprises two flexible protective pads each secured on one of the two end portions of the
9 elongated body.

10 Further benefits and advantages of the present invention will become apparent
11 after a careful reading of the detailed description with appropriate reference to the
12 accompanying drawings.

13 BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWINGS

14 Fig. 1 is a perspective view of a skateboard in accordance with the present
15 invention;

16 Fig. 2 is a front plan view in partial section of the skateboard as shown in Fig. 1;

17 Fig. 3 is a front plan view in partial section of the skateboard as shown in Fig. 1,
18 with a foam core material;

19 Fig. 4 is a perspective view of a first conventional skateboard in accordance with
20 the prior art;

21 Fig. 5 is a partial top plan view of a second conventional skateboard in accordance
22 with the prior art; and

23 Fig. 6 is a front plan view in partial section of the skateboard as shown in Fig. 5.

24 DETAILED DESCRIPTION OF THE INVENTION

25 Referring now to Figs. 1-3, a skateboard in accordance with the present invention
26 comprises an elongated hollow body (10) including a top plate (11), a bottom plate (12) and
27 two opposite closed side plates (13) each located between the top plate (11) and the bottom
28 plate (12), two support brackets (20) each secured on one of the two end portions of the
29 bottom plate (12) of the elongated body (10) by means of four bolts (15) and each having two

1 wheels (22) each rotatably mounted on one of the two end portions thereof, and two flexible
2 protective pads (30) each secured on one of the two end portions of the elongated body (10).

3 The skateboard further comprises a plurality of reinforcing ribs (14) each
4 longitudinally arranged in the elongated body (10) and each formed between the top plate (11)
5 and the bottom plate (12).

6 The elongated body (10) includes a support base (100) formed on the mediate
7 portion of the top plate (11) thereof, and the skateboard further comprises two strengthened
8 frames (141) each longitudinally arranged in the elongated body (10) adjacent to the support
9 base (100), and each formed between the top plate (11) and the bottom plate (12). The
10 elongated body (10), the reinforcing ribs (14) and the strengthened frames (141) are
11 integrally made of single moldable material, such as an aluminum alloy.

12 The skateboard further comprises a foam core material (16) inside the elongated
13 body (10) to fill the voids between the strengthened frames (141) and the reinforcing ribs
14 (14).

15 In such a manner, the elongated body (10) is made hollow, thereby greatly reducing
16 the weight thereof so as to increase its portability and to decrease the cost of fabrication. In
17 addition, the elongated body (10) is both flexible and elastic due to its hollow design. Further,
18 the elongated body (10) is made very strong by means of the reinforcing ribs (14) and the
19 strengthened frames (141) such that it is not easily deformed when it hits or is hit by foreign
20 objects. Moreover, the elongated body (10) is integrally made of an aluminum alloy such that
21 it can be reused when being worn out.

22 It should be clear to those skilled in the art that further embodiments may be made
23 without departing from the scope and spirit of the present invention.

WHAT IS CLAIMED IS:

1. A skateboard comprising:

an elongated body (10) including a top plate (11), a bottom plate (12) and two opposite closed side plates (13) each formed between said top plate (11) and said bottom plate (12); and

a plurality of reinforcing ribs (14) each longitudinally arranged in said elongated body (10) and each formed between said top plate (11) and said bottom plate (12).

2. The skateboard in accordance with claim 1, wherein said elongated body (10) includes a support base (100) formed on the mediate portion of the top plate thereof, and said skateboard further comprises two strengthened frames (141) each longitudinally arranged in said elongated body (10) located adjacent to said support base (100), and each formed between said top plate (11) and said bottom plate (12).

3. The skateboard in accordance with claim 2, further comprising a foam core material (16) inside said elongated body (10) and located between said strengthened frames (141).

4. The skateboard in accordance with claim 2, wherein said elongated body (10), said reinforcing ribs (14) and said strengthened frames (141) are integrally made of an aluminum alloy.

5. The skateboard in accordance with claim 1, further comprising a foam core material (16) inside said elongated body (10) and located between said reinforcing ribs (14).

6. The skateboard in accordance with claim 1, further comprising two flexible protective pads (30) each secured on one of the two end portions of said elongated body (10).

ABSTRACT OF THE DISCLOSURE

A skateboard includes an elongated body having a top plate, a bottom plate and two opposite closed side plates each located between the top plate and the bottom plate, a support base formed on the mediate portion of the top plate, a plurality of reinforcing ribs each longitudinally arranged in the elongated body and each supported between the top plate and the bottom plate, two strengthened frames each longitudinally arranged in the elongated body located adjacent to the support base, and each supported between the top plate and the bottom plate, and a foam core material inside the elongated body located between the strengthened frames and the reinforcing ribs.

DECLARATION FOR PATENT APPLICATION AND APPOINTMENT OF ATTORNEY

As a below named inventor, I hereby declare that my residence, post office address and citizenship are as stated below next to my name; I believe that I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is claimed and for which a patent is sought on the invention (Design, if applicable) entitled: **Skateboard**

the specification of which (check one):

☒ is attached hereto.

☐ was filed on:

as Application Serial No.:

and (if applicable) was amended on:

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment(s) referred to above. I acknowledge the duty to disclose information which is material to patentability as defined in **Title 37, Code of Federal Regulations, § 1.56**. I hereby claim foreign priority benefits under **Title 35, United States Code § 119** of any foreign application(s) for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application on which priority is claimed.

PRIOR FOREIGN APPLICATION(S)			PRIORITY CLAIMED	
Number	Country	Day/Month/Year Filed	Yes	No

I hereby claim the benefit under **Title 35, United States Code, § 120** of any United States application(s) or PCT international application(s) designating The United States of America listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in that/those prior application(s) in the manner provided by the first paragraph of **Title 35, United States Code, § 112**, I acknowledge the duty to disclose information which is material to patentability as defined in **Title 37, Code of Federal Regulations, § 1.56** which became available between the filing date of the prior application(s) and the national or PCT international filing date of this application:

Application Number	Filing Date	Status - Patented, Pending or Abandoned

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under **section 1001 of title 18 of the United States Code** and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

POWER OF ATTORNEY: I(We) hereby appoint as my(our) attorneys, with full powers of substitution and revocation, to prosecute this application and transact all business in the Patent and Trademark Office connected therewith:

Morton J. Rosenberg, Esq. 26049; David I. Klein 33253 ; Jun Y. Lee 40,262

I(We) authorize my(our) attorneys to accept and follow instructions from **TAI E INTERNATIONAL PATENT & LAW OFFICE** regarding any matter related to the preparation, examination, grant and maintenance of this application, any continuation, continuation-in-part or divisional based thereon, and any patent resulting therefrom, until I(We) or my(our) assigns withdraw this authorization in writing.
